SELECTMEN'S REPORT.

The Board organized with the choice of Mr. Maxfield as chairman and Mr. Brownell as clerk.

Miss Lillian H. Simas was chosen as secretary of the Board of Overseers of the Poor.

One of the first matters taken up outside the routine duties was the continued negotiation with the New Bedford Gas and Edison Light Company as to improved street lighting service in accordance with the vote of the town. The question of price was taken up with the Board of Gas and Electric Light Commissioners in Boston informally, with the result that later this Board was able to make a five year contract with the Company for better lights at a substantially reduced cost.

In place of the old sixteen c. p. carbon lamps we now have thirty-two c. p. Tungsten lamps with efficient reflectors. so that the results in lighting the streets, as every one must have observed, are far better than before. For these the town pays during the first three years of the term of the contract, the sum of \$14.25 per lamp per year, and during the fourth and fifth years it will pay the sum of \$13.25 per lamp per year. The former price was \$15.60 per lamp per year.

This means a saving on the basis of the present number of lamps, which is 123, of \$166 for each of the first three years of the contract, and \$289 for each of the last two years of the contract.

An arrangement was also made with the company for the substitution at the same price of two 250 c. p. Tungsten lamps for each of the old arc lamps, with a result much more satisfactory in the quality and distribution of the lighting of what perhaps are the most important streets and squares.

The matter of introducing gas in the town was also taken up and your Board has drawn up and adopted certain conditions under which the New Bedford Company may lay its mains and pipes in our streets.

The condition which may be of the most general interest is that the company shall restore the streets to a condition as good as that in which they were found and to the satisfaction of the Selectmen.

Taken together with the right given to a town by the general laws of the state of purchasing the plant of a gas company within its territorial limits, we feel that the rights of the town are amply protected. The temporary inconvenience of having the streets torn up will be far more than compensated by the opportunity of having gas for cooking and lighting in our homes.

The following is a list of the streets in which the company has agreed to lay its pipes:

Howland Road, from its intersection with North Main Street to the west town line on said street.

Oak Street, south from the Howland Road.

North Main Street, from the intersection of Howland Road, northerly to the intersection of Adams Street.

Adams Street, from the intersection of North Main Street, approximately eleven hundred feet, (1,100 ft.)

From Adams Street on East Coggeshall Street, approximately 1,000 feet.

North Main Street, from its intersection with Howland Road through Main Street to Church Street.

Church Street, from intersection of Main Street, to Laurel Street.

Fort Street, from Church Street to Cedar Street.

Oxford District.

Cook Street, from North Main to Cherry Streets.

North Street, from North Main to Cherry Streets.

Oxford Street, from North Main to lower cross street.

Lafayette Street, from North Main to lower cross street.

North Main, to Cherry Street.

Cherry Street, from Cook to North Main Streets.

Streets Tending East and West.

Bridge Street, from D. W. Deane's to approximately 800 feet east of Adams Street.

Cowen Street, from Privilege to Main Streets.

Spring Street, from Main to Chestnut Streets.

Washington Street, from Water to Summer Streets.

Center Street, Water to Rotch Streets.

Union Street, Water to Chestnut Streets.

Farmfield Lane, Green to Laurel Streets.

Cottage Street, Fort to Green Streets.

Huttleston Avenue, North Walnut to Adams Streets.

Streets Tending North and South.

Privilege Street, Bridge to Pease Streets.

Water Street, Washington Street to Railroad.

Middle Street, Washington Street to Railroad.

William Street, Spring Street to Cemetery.

Walnut Street, Spring Street to Cemetery.

Green Street, Spring to Cottage Streets.

Laurel Street, Rodman to Church Streets.

Chestnut Street, Rodman to Union Streets.

Pleasant Street, Rodman to Union Streets.

Rotch Street, Rodman to Center Streets.

Summer Street, Rodman to Center Streets.

During the year the interest on the Ricketts fund and on the Pease fund was drawn and credited to its proper departments.

Last year on the Board's recommendation, the town voted to transfer from the incidental account to the credit of the New Bedford and Fairhaven Bridge account, the sum of \$2,981, to pay the then outstanding bills for maintenance. Continued efforts have failed to procure from the City of

New Bedford bills which the Board felt it should approve, so that those bills remain unpaid. The balance thus credited, however, is obviously pledged for the payment of those bills when properly rendered, and should not be relied on for the payment of any others.

In September the town boundaries were perambulated in accordance with the provisions of the law.

During the year the Board of Health voted to abolish the nuisance known as the Garcia drain on Washington street as the only satisfactory and permanent solution of that difficulty, and at the request of that Board we voted that the work of building a drain from Washington street around the corner of Rotch street should be done under the supervision of the Street Department. The result was that the nuisance was completely eliminated at a cost much less than would have been incurred had the work been done by a private contractor.

In accordance with the vote of the town to build a house for the Fire Department at Oxford specifications were drawn up and submitted to bids. The first bids were all above the amount of the appropriation, so that changes in the specifications became necessary. The house has now been erected satisfactorily for \$500, the amount appropriated.

At the annual meeting in March, 1910, the town on recommendation of this board appropriated the sum of \$14,187.96 for debt and interest, \$8,787.96 being for principal of the debt and the balance for interest. This was with the idea of renewing \$3,000 of the debt, namely, the Oxford sewer note of \$2,000 and the Pease district sewer note of \$1,000. In November when the notes became due it appeared that there was money enough on hand to pay \$2,000 more than was planned, and the board therefore voted to pay the Oxford sewer note instead of renewing it, thus saving interest and reducing the town debt.

During the year two copies were printed of the deed from Mr. Rogers to the town conveying the High School property. These copies were framed and placed in the entrance halls

of the school building in accordance with the condition of the deed requiring that they be placed in a prominent position in the school.

Under orders from the State Commissioner of Records changes had to be made in the vaults in the Town Hall where the town records are kept to conform to the requirements of the state law that such vaults shall be entirely fire-proof. Bids were obtained from companies making a specialty of that work, but all provided for equipment so much more elaborate and expensive than your board felt was necessary that we had the work done on a plan drawn by Mr. Maxfield at a very much reduced cost and in a manner which fully meets the requirements of the Commissioner.

The road roller now owned by the town is in such a condition that it will not do the work required of it. The boiler is so weak that the State Inspector will allow a pressure of only 80 pounds whereas for the work of resurfacing which must be done this coming year, it is necessary to have a pressure of 130 pounds. This means a thorough overhauling of the old roller at an expense of \$1,200 or the purchase of a new roller. The old roller has been in use for about 15 or 16 years, a period which is fully up to the average life of road rollers.

Considering that even after the substantial outlay necessary to put the present roller in working condition the machine at best would be still an old one, your board feels that it will be economy in the end for the town to buy a new roller at a cost of \$3,500, less what sum will be allowed for the old one.

With the large balance remaining to the credit of the Street Department, we feel that if the town will appropriate the sum of \$2,000 for the maintenance of the streets, the same as last year, a new roller could be bought without asking any special appropriation for it.

In connection with the requirements of the town for financing for the coming year, we have to report the following figures for debt and interest:

Sewer bond due October 1, 1911,	\$4,500.00
Bridge bond due November 20, 1911,	1,000.00
Oxford sewer note November 17, 1911,	2,000.00
Bridge note (maintenance) November 10, 1911,	3,290.24
Main street sewer note November 6, 1911,	1,100.00

\$11,890.24

Interest on bridge bonds,	\$1,520.00
Interest on sewer bonds,	1,460.00
Interest on notes,	1,700.00
Interest on temporary loans,	600.00

5,280.00

Making total for debt and interest of \$17,170.24

We respectfully submit the following estimates for appropriations for the ensuing year as asked for by the various departments.

Debt and interest,	\$17,170.24
Highways,	2,000.00
Poor,	2,300.00
Sewers,	5,000.00
Fire,	1,800.00
Fire alarm,	150.00
Hydrants,	2,300.00
Police,	1,000.00
Town Hall,	800.00
Salaries,	3,400.00
Street lights,	1,600.00
Park Department,	1,350.00
Trees,	1,200.00
Board of Health,	500.00

\$40,570.24

Respectfully submitted,

CHARLES P. MAXFIELD,

LEWIS F. BENTLEY,

MORRIS R. BROWNELL,

Selectmen of Fairhaven.

REPORT OF SUPT. OF STREETS.

The Board of Selectmen appointed Mr. Charles P. Maxfield Superintendent of Streets. Mr. Henry C. Pierce was selected as foreman.

All bills for current expenses of the highway department were paid when they were presented, this leaves the entire department free from debt, and with a balance to the credit of the department, \$6,025.38

It has been the aim of the Street Department to keep the streets of the town as clean and tidy as possible, keeping up the general character of our town for cleanliness.

During the year work was done on the streets and sidewalks where repairs seemed to be most needed. The outlying roads of the town received more attention this year than usual. Would recommend that repairs on same be continued next year.

The use of oil on the streets we found by last year's experience to be a great help in preserving our streets both as a binder and preventing the top covering of our streets being blown away in dust, and viewed from a sanitary point, the use of oil is recommended by the physicians of our town.

We therefore bought 17,149 gallons of Dustoline, &c. The results of its use have been very satisfactory. 1,126 gallons of the oil was used on the track at the High School Stadium, for which payment was received, as shown in the financial account.

The following is a brief statement of the work done by the Street Department during the year:

MACADAMIZING.

North street,	600 feet
Washington street,	425 "
Farmfield street,	750 "
Howland road, extension,	140 "
Washington and Rotch streets,	150 "
Main and South streets,	45 "
Laurel street,	40 "
————	2,150 feet

RESURFACED OLD MACADAMIZED STREETS.

Main street,	200 feet
Laurel street,	100 "

And resurfaced around manholes to sewers.

GUTTERS PAVED.

Various places,	150 feet
Main street repaved,	200 "

CURBING AND EDGE STONE SET FOR CURBING PURPOSES.

In various locations,	900 feet
-----------------------	----------

SIDEWALKS BUILT, REPAIRED AND SCREENED.

William street,	500 feet
Farmfield street,	1,000 "
North street,	600 "
Adams street,	1,000 "
Center street,	300 "
Spring street,	600 "
Other sidewalks, estimated,	800 "
————	4,800 feet

The following roads and streets were attended to:

Weeden road repaired with gravel. Gutters and culverts opened and highway widened, from Washington street to the Ephraim Delano Farm at a cost of:

Gravel,	\$26.70
Teams and labor,	232.79
————	\$259.49

East Spring street, new culvert, sidewalks and street repaired at a cost of	85.00
Washington street, new sidewalks, gutters and street repaired at a cost of	123.00
Mulberry street, sidewalks and street at a cost of	56.00
Jefferson street, sidewalks and street at a cost of	60.00
Christian street, sidewalks and street at a cost of	36.00
Sycamore street, new sidewalk and gravel for street at a cost of	110.00
Farmfield lane or Harbor View street, teams, labor and cinders at a cost of,	243.44

\$120.00 was received by the Town Treasurer, as part payment from the abutters and others, for the repairs of this street. Credit for same is shown in financial account.

New road or Bridge street east end was repaired at a cost of	\$257.59
Boston Hill road repaired at a cost of	76.25
Mill road was repaired at a cost of	19.80
New Boston road was repaired at a cost of	13.80

CATCH BASINS BUILT.

Three corner of Washington and Rotch streets; 1 on Adams street connected with gravity sewer.

CRUSHER STONE.

There is on crusher lot 800 tons of stone, 600 tons of same crushed already for use.

The cost of removing snow from the streets in which there are car tracks was \$63.63, during the year just ended, and a bill for one-half the amount has been sent to the Union Street Railway Co., payment of which will be made to the Town Treasurer.

The attention of the citizens is called to the law which prohibits placing any rubbish or other material in the high-

ways of the town. As many of our citizens, janitors of our public buildings and churches, have been in the habit of cleaning their yards and lawns of grass, leaves, &c., then raking or sweeping the same into the streets, this law applies. Trusting this notice will be sufficient, and that we all use barrels in which to place our refuse in the future, by so doing it will be received by the ash cart.

REPORT
OF
PARK COMMISSIONERS

REPORT OF PARK COMMISSIONERS.

TO THE HONORABLE BOARD OF SELECTMEN :—

Gentlemen:—The Board of Park Commissioners present their second annual report covering the period between March 1, 1910, and Feb. 1, 1911. During this period we have expended \$1,551.85 as follows :

Maintenance of Cushman Park,	\$980.00
Maintenance of Delano Park and bridge approaches,	175.00
Re-piping bridge approaches,	131.50
Changing shrub beds and new shrubs on bridge approaches,	67.35
Trees and grading Walnut street extension,	60.00
New trees and shrubs and transplanting shrubs, Cushman Park,	64.30
Spraying trees,	15.00
Policing park,	20.00
Rent of tool house,	36.00
Incidentals,	12.70
	<hr/> \$1,551.85
Balance, March 1, 1910,	\$242.33
Appropriation, March 1, 1910,	1,500.00
	<hr/> \$1,742.33
Balance, Feb. 1, 1911,	190.48
	<hr/> \$1,742.33

We respectfully suggest that the town appropriate \$1,350.00 for the care of the Park system for 1911.

Yours truly,

FAIRHAVEN PARK COMMISSION,
J. F. HALL, Secretary.

REPORT

OF THE

SEWER COMMISSIONERS

REPORT OF SEWER COMMISSIONERS.

The Board met March 12, and organized as follows :

C. F. Delano, Chairman.

Z. W. Dodge, Inspector.

J. S. Gifford, Clerk.

At the annual town meeting \$4,000 was appropriated for sewer maintenance; in addition to this \$41.04 was received from other sources.

At the annual town meeting it was voted that the Board of Selectmen serve as a joint committee with the Sewer Commissioners to report at a future special town meeting on the condition and requirements needed at our sewer power station.

The Joint Committee met and voted to employ Mr. C. W. Whiting, who is an expert on oil engines.

By his advice the Sewer Commissioners made a contract with the De La Vergne Machine Co. for a Hornsby Akrod engine of 20 horse power capacity. He also recommended a George F. Blake Compressor, also two 4,500 gallon tanks for the storage of oil, as oil can be purchased in tank cars for one-half the price, and he also recommended a water-tight concrete pit for the tank to be placed in.

Proposal for "De La Vergne" Oil Engine for Direct Connection to Air Compressor.

This is a proposal by the De La Vergne Machine Company of New York, hereinafter called the Contractor to the Honorable Board of Sewer Commissioners of Fairhaven, Massachusetts, hereinafter called the Purchaser, to furnish, supervise the erection of and start one twenty (20) H. P. De La Vergne type H. A. oil engine, in accordance with the specifications attached, which form a part of this proposal.

DE LA VERGNE MACHINE COMPANY.**Specifications Covering one 13½ inches by 16 inches De La Vergne Oil Engine.**

General: The engine shall be a single cylinder horizontal engine of the four stroke cycle type, and shall be capable of developing twenty (20) actual or brake horse-power at a speed of 200 R. P. M.

Cylinder: The cylinder shall be of hard, close-grained iron, and shall be water jacketed.

Vaporizer: The vaporizer shall be of a special mixture of cast iron, and shall be bolted to the head of the cylinder.

Valves. The valve box, attached to the cylinder, shall be fitted with two valves, one for admitting the air and the other for letting out the exhaust, both being controlled by suitable levers actuated by hardened cams on the cam shaft.

Piston: The piston shall be of close grained grey cast iron, fitted with metallic rings of a special mixture of iron, and coupled direct to the connecting rod.

Connecting Rod: The connecting rod shall be of steel, and fitted with adjustable box at the crank end.

Crankshaft: The crankshaft shall be of steel. It shall be fitted on the left hand end, looking from the cylinder, with a flanged coupling, one-half of which shall be sent to the compressor manufacturer, to be fitted by them to the compressor shaft.

Price: Sixteen hundred fifty dollars (\$1650.) net.

Flywheels: The engine shall be equipped with two flywheels of such weight that they will give a practically uniform speed of rotation to the combined unit, it being understood that no flywheels are to be supplied with the compressor.

Lubrication: Provisions shall be made for the continuous lubrication of all working parts. The crankpit shall be fitted with a shield to prevent oil from being thrown by the crank and connecting rod and shall be piped for drawing off the oil. An oil groove shall be cast around the outside of the engine bed.

Pump: The cylinder shall be equipped with a pump for supplying oil to the vaporizer. The pump shall be of bronze, fitted with steel ball valves for the suction and for the delivery.

Governor: The governor shall be of the Porter fly ball type without springs and capable of sensitive adjustment and regulation, especially designed and arranged to control the supply of fuel. It shall be so designed that the nominal speed, 200 R. P. M., may be readily reduced 10%.

Oil Supply: The Contractor shall furnish a stand pipe and a rotary pump for lifting the oil from the Purchasers storage tank to the engine pump. The Contractor shall also furnish a removable filter for filtering the oil before it enters the engine pump.

Silencer: One silencer of cast iron shall be supplied with the engine so as to reduce the noise of the exhaust. This silencer shall be complete with one four inch and one five inch companion flanges and the necessary nuts and bolts, all as per the Contractor's drawing 86-R.

Lamp: A portable lamp shall be provided with the engine for heating the vaporizer.

Finish: All bright surfaces shall be machined and polished and protected from the weather during transportation. All other surfaces that will show when the apparatus is set up shall be well filled, rubbed down smooth and given two coats of paint of a dark slate color.

Piping: The Contractor shall supply all piping that is a part of the regular equipment but shall not furnish or erect any piping leading to or from the engine.

Accessories: The Contractor shall supply a complete set of wrenches, spanners and other tools required in dismantling and assembling the machine. He shall also furnish a foundation print but shall not furnish template or foundation bolts or plates.

Erection: The Contractor shall furnish a competent man to supervise the placing on the Purchaser's foundations not only the oil engine herein specified but also such a compressor as may be separately purchased, to level, line up, connect and grout the two machines and to operate the combined unit for a period of two weeks. The Purchaser shall furnish all necessary labor, tackle and carting facilities for taking the engine and compressor from the cars and placing them upon the foundations. The Purchaser shall furnish also, all fuel, lubricating oil and other necessities for the starting and operating of the plant during the two weeks period above mentioned.

Guarantees: The Contractor guarantees that workmanship and material shall be strictly first class throughout and subject to the approval of the Purchaser's engineer. The Contractor further guarantees to furnish free of charge any part or parts proving defective during a period of one year from the date of shipment, through poor workmanship or material. It shall however be understood that if there is a question as to the responsibility of the Contractor or Purchaser in case of any breakage the alleged defective part shall be returned to the Contractor with transportation prepaid.

The Contractor guarantees that this engine will develop its rated capacity at the nominal speed of 200 R. P. M. with a consumption of not over one pound of fuel oil per B. H. P. per hour, it being understood that the fuel oil shall not be heavier than 24 degrees Beaume and that it shall have a flash point between 100 and 250 degrees Fahrenheit and shall contain not less than 18000 B. T. U. per pound.

Price: Sixteen hundred fifty dollars (\$1650.) net.) If the silencer herein specified is omitted the price shall be \$1625.

Terms: 50% when the machine arrives at Fairhaven. 25% when the equipment is ready to run. 25% thirty days after it is ready to run.

It is to be understood that payments shall not be delayed in case any delay in starting is due to the fault of any other party or parties than the De La Vergne Machine Company.

Shipment: Shipment shall be made within twenty (20) days after the acceptance of this proposal by the Board of Sewer Commissioners of Fairhaven, Massachusetts, and its approval by an authorized officer of the De La Vergne Machine Company of New York, it being understood that such an acceptance is made within two weeks from the date thereof.

This proposal shall become a contract upon its formal acceptance by the Board of Sewer Commissioners of Fairhaven, Massachusetts, or their authorized agent and its approval by an authorized officer of the De La Vergne Machine Company of New York City, providing the proposal is accepted within two weeks of the date thereof.

Respectfully submitted,

De La Vergne Machine Company,

by A. W. DOE.

June 28th, 1910.

Accepted: July 11, 1910.

CLARENCE F. DELANO,
ZENAS W. DODGE,
JESSE S. GIFFORD.

Approved:

L. PRELLING, V. P.
July 13th, 1910.

By observing strict economy we have been able to keep within our appropriation for maintenance.

As regards to the working of the new oil engine, we are unable to report at present. Expenses of installing and work that had to be done has caused us to call for an appropriation of \$5,000 to enable us to pay outstanding bills and pay our regular expenses for the year. 1911.

C. F. DELANO,
Z. W. DODGE,
JESSE S. GIFFORD, Clerk.

REPORT
OF THE
BOARD OF HEALTH

REPORT OF THE BOARD OF HEALTH.

TO THE CITIZENS OF FAIRHAVEN :—

The Board of Health respectfully submits its annual report for the year 1910.

The Board organized March 9th, 1910, with a choice of Dr. A. N. Bruckshaw as Chairman, and A. W. Kelley as Secretary.

There have been reported to the Board by physicians during the last twelve months, 48 cases of contagious and infectious diseases as follows: 18 of Diphtheria, 9 of Measles, 8 of Typhoid Fever, 6 of Varicella, 6 of Tuberculosis, 2 of Scarlet Fever, 1 of Tetanus.

The Board has received numerous complaints of nuisances and unsanitary conditions. Upon notice to the owners of such property, the nuisances in nearly every case, have been promptly attended to and abated.

Soon after organizing, it became very evident to the members that, to properly attend to their duties, that meetings must be held oftener than once a month, and upon due consideration, it was voted to meet the first and third Mondays of each month, and later, this was changed to the first and third Thursdays of each month, and besides these regular meetings, the Board has had many special ones.

Bids were advertised for the collection of swill and garbage, and at a special meeting held April 18th, the contract for same was given to E. G. Dwelley, who agreed to collect same within a prescribed limit, making at least two collections a week, and to provide a water tight iron tank to convey same through the town.

As was to be expected, inaugurating a system of this kind for the first time, there have been many complaints regarding the non-removal of swill. In every instance of such neglect, it has been called to Mr. Dwelley's attention and remedied.

We would suggest that the system be continued, and also that the citizens would provide water tight cans or tubs with covers, and of large enough capacity to keep them from overflowing between collections.

William H. Staples was appointed inspector of slaughtered animals by the Board, as the law directs, and 250 slaughtered animals have been inspected as follows:

Swine,	176
Beeves,	39
Calves,	35

Two slaughter house licenses were issued by the Board of Selectmen, and have been twice inspected by the Board of Health, one of which on each inspection was found to be in a sanitary condition. The other can and should be improved upon before granting another license. No contagious diseases among the cattle in town, have been reported to this Board.

There were 19 permits or licenses granted this year, for persons who desired to take clams or quahogs from the polluted waters of the town and to use the same for bait only.

After a joint meeting with the New Bedford Board of Health, it was voted at a regular meeting of the Board, May 16th, that all permits for the taking of shellfish in the contaminated waters of Fairhaven, be revoked June 15th.

On petition to the Board of Selectmen, an article was inserted in the warrant of the special town meeting held in May, recommending that the town appropriate a sum of money to construct and maintain a drain in Washington street, easterly and down Rotch street, thus doing away with the drain across the land of Antone Garcia. The town voted to construct the drain, and at a joint meeting of the Board of Selectmen and this Board, it was decided that Superintendent of Streets Maxfield take charge of the work and construct same—the bills to be approved by the Board of Health. The work was carried out at a cost of less than

\$300, not only abating a very bad nuisance, but greatly improving a dangerous corner.

The Board would also strongly recommend that the open ditch at the southeast corner of Centre and Rotch streets be given early attention and a covered drain be laid on that part of the property on the town highway, and that some other means be taken for a better drainage across the private property to the culvert in the railroad track.

During the latter part of the year, there was quite a serious outbreak of typhoid fever at the south end of Hitch street, caused by water used from wells sunk in the low and swampy land. The matter was taken up with the State Board of Health, and after examination by their representative, was ordered condemned, by this Board. The Fairhaven Water Company, on having the matter called to their attention, very generously and promptly extended the water pipe, thus enabling the property owners, to connect with town water. The State Board also states that this land should not be used for dwelling for human habitation, so long as it remains in the wet and soggy condition that it now is. If there is any way of preventing further building there, until the grade is raised, such means should be taken, to stop it as soon as possible.

We would also suggest, that before the summer season opens at Pope Beach and Harbor View, that these two places be visited by the Board of Health, and that rules and regulations be made governing the disposal of swill and garbage, sewerage and privy vaults. Also that the pig district be defined, and that no one be allowed to keep swine within said district, without a written permit from the Board.

From the fact that it now requires in every case of diphtheria two negative cultures before the patient can be discharged and quarantine raised, the physician on the New Bedford Board of Health has been making examinations for this Board at a cost of \$3.00 each. We would recommend that the town buy a microscope and let the physician of the Board make the examination.

Another necessity that this town requires, is a separate building connected with the almshouse, that could be used for a hospital or pest house—as the law now covering contagious and infectious diseases, in many cases requires that the patient shall be isolated and if the premises are quarantined, thus causing a resident wage earner to remain within such house or place, or otherwise to interfere with his following his employment, he shall receive from such town compensation to the extent of three-quarters of his regular wages. A hospital of this kind could be used for this purpose, and also it would be badly needed in the case of an epidemic, and in cases of tuberculosis the town would not have to pay some state sanatorium \$4.00 a week for each patient thus boarded. During the past year one such patient has cost the town \$207.00. From the fact that the town now has a population of over 5,000 inhabitants, there are a number of changes that will have to be made according to law.

At the north end of the town, there are a number of three-story tenements that have not been provided with suitable fire escapes, and there should be appointed, an inspector of buildings, also an inspector of plumbing. This duty could be performed by one of the Selectmen or one of the Board of Health, and a fee charged for each inspection.

It is imperative that the town give attention as promptly as possible, to the matter of sewerage at that end of the town, and it should be treated and given due consideration at the town meeting, and not be left to the consideration of the Board of Health to investigate complaints and abate nuisances in a district that the town refuses to give any consideration whatever, in this matter.

We have also found that in a large number of cases, that the surroundings of the production of milk is far from what it should be. We believe that every party selling milk in the Town of Fairhaven, should be licensed—that there should be rules and regulations established, and that before a party is granted a license, that his place should be exam-

ined, and until he complies with such, no license shall be granted him. This should apply not only to citizens of the town, but to any other person bringing milk into town. In this manner, the citizens can be assured of a pure supply of milk, and which we now know in many instances, they are not getting. Also every peddler of fruit, vegetables, fish, meat and provisions should be licensed, and the fees for such licenses will go a long ways towards paying the expenses of having these officials. The inspector of slaughtered animals, live animals and milk, could be one and the same person.

A. N. BRUCKSHAW, M. D., Chairman,
C. E. WESTGATE,
A. W. KELLY, Secretary.

REPORT OF CATTLE INSPECTOR.

TO THE HONORABLE SELECTMEN AND BOARD OF HEALTH:

Gentlemen:—I herewith respectfully submit my annual report as Inspector of Animals as follows:

During the month of October I inspected 101 stables, and in most cases found an improvement over last year's conditions. Of the 101 stables inspected, 72 were well lighted, 42 well ventilated, and 76 kept clean. In all, I examined 1,086 animals: 1 goat, 2 sheep, 395 swine, 540 cows, 134 young cattle, 10 bulls, and 4 oxen.

Up to Feb. 1, I condemned two cows affected with tuberculosis, for which the owner received pay from the state. Three cattle which I had under observation were condemned at the slaughter house, and at present I have one cow under observation.

Respectfully submitted,

W. H. SCHROEDER,
Inspector of Animals.

TREE WARDEN'S REPORT.

To the Citizens of Fairhaven:

The Tree Warden herewith respectfully submits his annual report to the citizens of Fairhaven.

After general inspection of the trees I am able to report their condition as satisfactory in the main. Of course there are individual trees which show signs of deterioration, both from natural causes and from unnatural but unavoidable conditions. These have received the best treatment at our hands.

Eighty new trees have been planted to replace losses and in newly developed streets. There have been no trees removed.

The spraying of the public shade trees for the elm leaf beetle was thorough and successful. Following the precedent of last year, we sprayed, at the expense of the owners, a good proportion of the privately owned trees both in Fairhaven and Mattapoisett.

As much trimming was performed as was necessary to insure freedom of traffic.

The trees of Fairhaven are a valuable asset, and in order to realize their full value they must be confined to their proper functions—those of affording pleasure and shade without the inconvenience of overgrowth. They will require a more extensive trimming this year. At the same time the insect pests of this year cannot be fought ten years hence.

The Tree Warden respectfully recommends that the sum of \$1,200.00 be appropriated to accomplish the work of maintenance and preservation.

Respectfully submitted,

PETER MURRAY,
Tree Warden.

FIRE DEPARTMENT.

TO THE HONORABLE BOARD OF SELECTMEN :—

Gentlemen:—The Board of Fire Engineers herewith present their report from Feb. 1, 1910, to Feb. 1, 1911.

We have had four bell alarms and 19 still alarms. The total value of property wherein fire has occurred is estimated to be about \$27,000, and the loss \$3,450.00. Of this loss \$1,135.00 was outside of the hydrant district. In accordance with the vote of the town, 1,000 feet of 2½ inch double jacket fire hose was purchased. Hose wagon No. 1, which has received a thorough overhauling and been equipped with new springs, is in first class condition. The Protecting Society wagon has been equipped with new extinguishers.

In accordance with the vote of the town, a house was built near the north end of the town in which to keep Hose No. 3.

We recommend the following amounts to be used for repairing, painting, and new equipments upon the apparatus: Hose No. 2, \$60.00; Hook and Ladder No. 1, \$20.00; Protecting Society, \$60.00.

We also recommend that a fire alarm signal bell or whistle be installed near the north end of the town.

Respectfully submitted,

ALBERT C. AIKEN, Chief,

HENRY L. WILSON, 1st. Asst.,

CLARENCE W. HAMMOND, 2d Asst.

FOREST WARDEN'S REPORT.

TO THE HONORABLE BOARD OF SELECTMEN :

Gentlemen:—I herewith present to you my report from Feb. 1, 1910, to Feb. 1, 1911.

Owing to the extremely dry seasons which we have had, forest fires have been numerous. On two occasions a fortunate shift of wind saved hundreds of acres of valuable wood land.

The number of fires handled by the department was 21. Number of acres burned over, about 225. Cost to extinguish, \$90.59.

Forest Warden,

ALBERT C. AIKEN, 88 Centre Street.

Deputy Wardens,

Charles F. Benson, 620 Washington St.

Edwin J. Howard, New Boston Road.

Chester F. Kendrick, 468 Main St.

George G. Lawton, Jr., Sconticut Neck.

Henry C. Pierce, Oak Grove Lane.

TOWN FARM REPORT.

BOARD OF OVERSEERS OF POOR AND CITIZENS OF FAIRHAVEN :—

I respectfully submit to you my report for 1910.

Number of inmates, eleven, four men, six women, and one baby 18 months old. Two men help with work outside, and one man and three women help inside. Good supply of vegetables of all kinds grown for summer and fall consumption, also full supply stored and canned for the winter. We raise plenty of hay on the farm for the stock. Stock consists of one horse, and one cow that supplies us with plenty of milk, also 40 hens that produce all the eggs we need.

The improvements consist of painting the walls of the inmates' dining room and hallways on the first and second floors, ceilings whitened in men's and women's sitting rooms, also one large window cut between inmates and warden's dining room for observation. The main hall and stairways have been newly carpeted.

There have been given the farm a few pieces of good furniture that has been repaired and put to use. I would be pleased to have the residents of the town take an interest in and visit the farm at any and all times. We strive to make it pleasant and homelike for the inmates, and think it is appreciated by them.

Very respectfully,

JOHN L. ELDRIDGE.

AUDITORS' REPORT.

Fairhaven, Mass., Feb. 27, 1911.

We hereby certify that we have examined the accounts of the Tax Collector, Treasurer, Selectmen, Overseers of the Poor and the School Committee, of the Town of Fairhaven, for the year ending Jan. 31, 1911, and believe them correct.

NATHANIEL POPE,
JOSEPH H. ALLEN,
Auditors.

FAIRHAVEN, MASSACHUSETTS

SCHOOL COMMITTEE

DANIEL W. KENDRICK,	Term expires 1911
DANIEL W. DEANE,	Term expires 1911
THOMAS A. TRIPP,	Term expires 1912
LEWIS E. BENTLEY,	Term expires 1912
LYMAN C. BAULDRY,	Term expires 1913
ALTON B. PAULL,	Term expires 1913

Chairman,
THOMAS A. TRIPP.

Secretary and Superintendent,
FRANK M. MARSH.

Superintendent's Office Hours,

Town Hall	{ Wednesday, 4.00-5.00 P. M.
	{ Wednesday, 7.00-8.00 A. M.
High School	{ Monday, 9.00-10.00 A. M.
	{ Monday, 12.00-1.00 P. M.

Appointments may be made for other hours.

SCHOOL CALENDAR.

1911

Tuesday, Jan. 3	All schools re-open
Wednesday, Feb. 22	Washington's Birthday
Friday, Feb. 24	All schools close. Mid-winter vacation
Monday, March 6	All schools re-open
Wednesday, April 19	Patriots' Day
Friday, April 28	All schools close. Spring vacation
Monday, May 8	All schools re-open
Tuesday, May 30	Memorial Day
Thursday, June 29	All schools close. Summer vacation
Tuesday, Sept. 5	All schools re-open
Thursday, Oct. 12	Columbus Day
Wednesday, Nov. 29	All schools close. Thanksgiving recess
Monday, Dec. 24	All schools re-open
Friday, Dec. 22	All schools close. Christmas vacation

1912

Tuesday, Jan. 2	All schools re open
Thursday, Feb. 22	Washington's Birthday
Friday, Feb. 23	All schools close. Spring vacation

No School Signals.

For the benefit of those who have difficulty in remembering the significance of the school signals, the following is submitted for reference:—

The signal at 8.00 a. m. indicates no school for grades one to four, inclusive.

The signal at 8.15 indicates no school for all grades.

The signal at 12.30 noon indicates no school for grades one to four, inclusive.

The signal at 12.45 noon indicates no school for all grades.

Note.

Schools are often in session when weather conditions make it unfit for some children to attend, in which case parents must make their own decisions. At such times the schools are available for those pupils who wish to attend.

SCHOOL COMMITTEE MEETING, FEB. 11, 1911.

VOTED—That the report of the Superintendent of Schools be accepted and adopted as the report of the School Committee.

VOTED—That the Board ask for an appropriation of \$20,000 the sum necessary to maintain the schools on the present basis.

SUPERINTENDENT'S REPORT.

To the School Committee of Fairhaven :

I have the honor of presenting for the consideration of your board, the following report which covers briefly the main facts relative to the organization and conduct of this department for the past year. Such statistics as may be of interest concerning income, expenditure, enrolment, attendance, teachers, equipment, etc., are submitted in tables following this report.

The enrolment by grades and buildings may be found on a later page, which shows that there were during the Fall term 151 pupils in the High school; that the ninth grade of 39 pupils has occupied one room in the old High school; that the Rogers school, with eight rooms and the assembly hall as a recitation room, has accommodated the grammar school pupils in the centre of the town, with an average of 41 pupils to a room, while the primary grades numbering 249 pupils, occupied the six rooms at the Washington street school, with an average of 41.5 pupils to a room. At Oxford the first, second, third, fourth, fifth and sixth grades, only, could be accommodated, with an average of 42 pupils per room. The seventh and eighth grades from Oxford had to be transferred and transported on the electric car to the Old High school building, involving considerable expense for car tickets.

The total enrolment for the past fall term, was 964, an increase of 34 over the previous year, and an increase of 300 since the year 1900. The increase in average attendance over the last year was 41. The increase in average membership for the year ending June 30, 1910, over the year ending June, 1909, was 51. These increases in the year ending June, 1910, and during the fall term ending December, 1910, were so scat-

tered in different grades that it was possible after some planning and re-arrangement to take care of all these pupils with the same number of rooms and the same number of teachers as in the preceding year.

Nine teachers have had to be secured for Fairhaven, and three new janitors have been appointed, also three assistants in the cooking and lunch department.

In general, the schools have been conducted with little modification or change in the plans of previous years. The increased enrolment at the High school made it necessary to have an additional helper in the lunch department during a part of the day. The addition of a course in agriculture and the extension of the opportunities for manual training in the shop down to the seventh grade, involved the appointment of an assistant in the manual training department for three days per week. The general work of the High school has been carried on in its departments with effectiveness and faithfulness. The chief addition to the many splendid opportunities which the school has heretofore offered has been a course in agriculture, which has been carried on quietly and conservatively during the past year. During the present school year, 16 boys have been enrolled in this course, and are receiving, not only theoretical instruction in the principles of agriculture, but are obtaining a splendid practice in the shop, in those phases of manual training which may be applied to agricultural needs, anticipating the out-of-door manual training or practical field work when the spring returns. The advantages of such a course for many boys are so many and so varied that we hope for the extension and broadening of this phase of High school training.

The High school graduated last year a class of 21 pupils, the majority of whom are either actively engaged in remunerative positions, or are gaining further preparation for their life work in advanced schools. The list of High school graduates, for several years, with their present occupations and location,

appears later in this report, and will be of interest to all who are interested in the product of the public schools. Fairhaven may well be proud of the accomplishment of many of the recent High school graduates, as well as those notable men and women who were graduated in the earlier history of the school.

The High school faculty and those directly connected with the management of athletic training and events at the High school as well as the patrons of the school, should rejoice in the fact that the athletic conditions and standards are so high and wholesome that the influence upon the High school has been excellent and helpful rather than detrimental, as is too often the case. The aim has been first, manliness and honesty, and then victory, if possible.

The work in the grades has been carried on in all its phases as formerly, with an attempt to improve when possible. Especial effort has been made in recent years to improve the reading in the primary grades. In this we feel that the schools have been comparatively successful. As fast as possible the Aldine system is being extended to the upper grades, and after the excellent start which is given in the first three or four grades, we may safely hope for a marked improvement in the reading of grammar school pupils.

Perpaps greater concentration has been made on the teaching of writing than upon any other subject during the school year. The vote of your school board to adopt a modified slant writing in place of the vertical, and at the same time appropriate a small sum for the employment, for a few weeks, of a special teacher, has given impetus and direction to the new movement for better and more rational methods of teaching the subject. Weekly teachers' meetings for direction and practice or special supervision and instruction in the class room, has done much toward the laying of the foundation for improvement. Many parents who observe what their children are doing, have probably realized that the changing from a vertical system to a slant, and the changing from the cramped finger movement to

a free and comfortable muscular movement, involves many difficulties, and for a time, discouraging results. However, so well directed are the teachers' efforts, and so good have the comparative results become in the case of the majority of the pupils that we feel safe in being optimistic as to the outcome before the end of the year, and certain as to the results after pupils have had several years of training under the present method.

Contrary to the popular notion in many quarters, the modern school is giving an unusual amount of attention to reading, writing, spelling and arithmetic. We feel certain by observation and comparative tests that the general results are much better than those of twenty or thirty years ago, in spite of the fact that today we have many children who neither speak, nor read, nor spell the English language before they enter the schools, and many of these never speak, nor read, nor write, nor spell in English after they enter the school, except while in the school room.

One other branch of our elementary school work has been greatly improved by the adoption for all grades of a new, up-to-date series of geographies to replace the old books which had, for the most part, become completely worn out and out of date. This adoption following the introduction of physiologies and English and grammar texts last year, has made the text book equipment in these three subjects very satisfactory. It has also been necessary this year, because of the worn out condition of books that have been in use for four or five years, and the increasing demand for more material, to provide several sets of basal and supplementary readers. However, with these purchases of new books, the expense for books has been less than \$1.00 per pupil.

Beside the constantly occurring needs for repairs, there have been several unusual demands. At the Washington street school, new copper gutters had to be provided, and an electric blower had to be installed in one of the lavatories to remove

the foul air, and considerable expenditure upon the plumbing in the toilet rooms has been necessary.

At the Oxford school, beside minor repairs upon the boiler, a new state police valve had to be installed, and shades furnished for two of the rooms and halls.

At the Old High school, beside minor repairs, \$40.00 had to be expended upon the roof on account of bad leaks.

At the Rogers school, considerable expense was involved in stopping leaks on the east side of the building, and besides nearly \$100.00 was incurred in repairing the weather vane which had become so broken that it was in a dangerous condition. New shades were also provided for three of the rooms, and considerable painting, papering and calcimining was done in the janitor's tenement, which had had little attention for at least a dozen years. All the blackboards in this building needed to be re-finished. Another step was taken toward the re-newing of the floors in the Rogers school building, by the laying of a new floor in the upper corridor and hallway. The contract having been awarded to the lowest bidder according to the custom of this department in case of work involving a reasonable sum, and of such a nature that it can be figured. I do not need to call to the attention of your board, since you are all perfectly familiar with the fact, that the floors in the rooms at the Rogers school are in a very bad condition, and need renewing at the earliest possible opportunity. They are so worn and are splintering so badly that they are a source of possible danger at any moment.

I wish also to call the attention of the board to the fact that for several years the fourth and fifth grade children at the Rogers school have been obliged to sit in unadjustable chairs, and use desks altogether too small, the desks in these rooms being the desks and seats used by first and second grade children before they were transferred to the Washington street school. This condition has been tolerated thus far on account of the constant desire of this department to keep the expendi-

ture to the lowest minimum, but it should not longer be tolerated at the expense of these growing children.

Another serious problem which your board will have to consider and solve during the year will be the improvement of the ventilating system at the Washington street school. Conditions in this respect have never been adequate or satisfactory, and the various inexpensive temporary arrangements to remedy these defects have been futile. Inadequate and unsatisfactory as was the system originally, it has been much more so since the number of pupils in the building has been increased from thirty to forty per cent. more than the number originally anticipated for this building. It will, without doubt, be necessary also to have the exterior of this building painted.

The miscellaneous account as per schedule, following this report, shows the expenditures for such items as are not properly classified under any of the definite departments, such as the cost for electric lights at the Washington street school, made necessary on account of the dark corridors, and the two lower rooms, which are so low and improperly lighted that artificial light has to be provided on all dull days, and for motor service to run a fan which is necessary to properly heat these two basement rooms. There has to be included under this item now the amount of \$75.00 for medical inspection, and also charges for examining all children over fourteen who apply for working certificates. The item for water is also included in this department. The contract for converting the entire area west of the Washington street school into a condition suitable for a playground, together with the expense for fertilizer for the various school lawns, and various other items connected with the grounds, amounted to \$97.52. In this department will also be found items for express, freight, printing, postage, truant officer, clerical work and typewriting, telephone, care of trees, etc.

The accompanying schedules show the various expenses in other departments. It is a fact beyond controversy that public

education is expensive and increasingly so, but in the wisdom or unwisdom of the legislature, public education has become compulsory upon the towns, thus supplanting the policy of private school for few, and little or no school for many. It is fortunate, however, that Fairhaven has always had the proud record of doing the best she could in the way of furnishing the best possible opportunities for elementary and High school education. It should also be a source of local pride that ninety-nine out of every hundred of the citizens are generous in their willingness to provide reasonably good educational advantages, even though many of them may have no children to benefit by these advantages. It must be a source of satisfaction to your board to review the results of your constant endeavors to spend the appropriation for school purposes as wisely and economically as possible.

FAIRHAVEN'S rank in relation to other towns		Average taxation cost of public schools per child in the STATE	Cost per child out of local tax FAIRHAVEN	Actual cost per child including amt. contributed by H. H. Rogers
1901	178	\$26.49	\$20.52	\$25.76
1902	182	27.04	20.00	25.19
1903	177	27.30	21.07	26.03
1904	149	28.81	22.63	27.02
1905	153	28.49	22.71	27.00
1906	163	28.79	22.79	26.84

Total increase, *State*, 6.51 *Fairhaven*, 1.50 *Actual*, .81

*Estimated.

Total increase in taxation cost per child in the STATE, \$6.51
 Total increase in taxation cost per child in FAIRHAVEN, 1.50
 Total increase in actual expenditure per child in Fairhaven, .81

State average taxation cost per child, 1911, \$33.00
 Fairhaven taxation cost per child, 1911, 22.02
 Difference, \$10.98

Average cost per child in the State, 1911, \$33.00
 Cost per child in Fairhaven, not including High
 School pupils, 26.57
 Difference, \$6.43

In 1910. Total number of towns in the State, 353
 In 1910. Towns paying more than Fairhaven, 183
 In 1910. Towns paying less than Fairhaven, 169

The above table is an interesting and positive demonstration of the fact that you have been able to do better than most towns in keeping down the constant increase in per capita cost of instruction. For a period of ten years, the first column indicates that 150 to 200 out of 350 towns have been paying more per child than Fairhaven. The second column shows the average cost per child throughout the state for these years. The third column shows the taxation cost per child in *Fairhaven* during the same period. The total increase in cost per child in the state being \$6.51, while the total increase in cost per child during these same ten years has been only \$1.50 in Fairhaven. It will also be seen that during the year ending 1911 the cost per child in Fairhaven was \$10.98 less than the cost in the state. Even counting out the number of High school pupils, the cost per child in the year 1911 was \$26.56, or \$6.43 less than the *state* average.

The fourth column shows the actual cost per child based on the amount taken from the local tax, plus the amount contributed by Mr. Rogers, up to 1907. This column also shows that the actual amount expended for primary and grammar school pupils in 1911 was \$26.57, which is only \$.81 per child more than was expended per child in 1901.

This basis for comparing the cost of public schools is the only fair basis. Occasionally someone who wishes to be misleading, compares the amount which one town pays per child on the basis of its valuation, but such a comparison is absolutely unfair and unreasonable, since the wealth of a town may often be inversely proportional to the number of children who demand an education. The extremes on this basis run from \$9.64 expended for schools per thousand dollars of valuation down to \$.20, while Fairhaven comes in between with about \$5.59 on every thousand dollars of valuation. If Fairhaven, like Marion with her high valuation, paid \$1.32 per thousand, it would cut the school appropriation down to \$5,000.00, and the public school advantages be reduced 75 per cent. This is

manifestly impossible, either morally or under the statutes.

Another illustration of the misleading possibilities of bare statistics is given when a table shows that the town of Fairhaven is \$62.39, next to the highest salaries for women teachers in the county, when as a matter of fact Fairhaven is paying twenty of her twenty-three women teachers \$50.00 per month, and when there is averaged with this the salary of three principals, which positions in most places would be filled by men, (thus reducing the average paid to women), the average is only \$54.35. The amount of \$62.39 as given in the state report, is based upon the salaries of the teachers in the High school, which gives Fairhaven the reputation of paying her teachers near the average for the whole state, while as a matter of fact, the average for Fairhaven is \$7.47 less than the average for the state, and \$4.00 less than the county average.

TABLE SHOWING INCREASE IN EXPENDITURES BY DEPARTMENTS DURING THE PAST TEN YEARS.

	Teachers	Janitors	Transportation	Fuel	Books	Supplies	Repairs	Incidentals	Supervision	Totals	Total plus \$3,000.00 contributed

1901	8,363	1,264	284	752	320	330	289	542	900	13,044	16,044
	\$4,261	\$421	\$1,167	\$241	\$386	\$28	\$734	\$359	\$608	\$8,150	\$5,150

Another table which is here submitted furnishes an interesting comparison of expenses in the various departments during a period of ten years. Column 11 shows the total amounts expended each year as shown by the town treasurer's accounts. This indicates that in the year 1911 the schools cost the town \$8,150.00 more than the year 1901. Column 12, however, shows what was actually expended, that is, what was paid from the local treasury plus \$3,000.00 which was contributed by Mr. Rogers toward teachers' salaries up to 1907. Here a comparison of the expenditures of 1911 with the amount actually expended in 1901, shows an increase of only \$5,150. This increase of \$8,000.00 in a period of ten years has been caused, mainly, by increases in expenditures for teachers, janitors, transportation and repairs. In 1901 a drawing supervisor was added. In 1902-03 the tack factory opened, and during the following five years the average membership in the primary and grammar grades increased by 238, which increase necessitated six additional rooms, six additional teachers, janitors, fuel, and the usual contingent expenses for books, supplies, repairs, etc. Some of the rooms at the Rogers school were crowded to the breaking point. Six rooms have been opened at the Washington street school, one additional room and a part of the time a corridor at the Oxford school building, also two rooms have been opened at the old High school building. However, the schools at New Boston and Nasketucket have been closed, leaving a net addition of seven rooms and teachers, the drawing teacher making eight. These eight additional teachers at a salary of \$500.00 each, accounts for the increase in this column. The addition of a janitor at the Washington street school, and at the Old High school accounts for the increase in this column.

The increase in the fourth column results from the fact that first-class and absolutely safe and satisfactory facilities were provided for the Sconticut Neck section at an increased expenditure of about \$350.00, which in total about equals the

cost of an unsatisfactory mixed school in this locality. Then the closing of the Nasketucket and New Boston schools and the cost of transporting these children, together with the cost of transporting a whole class from Oxford to the Old High school, accounts for the increase here.

So little had been expended for ordinary repairs in the year 1901 and previously, that additional expenditures under this head have been imperative; besides, it has been necessary to expend from \$1,000.00 to \$1,500.00 in re-modelling the old manual training and cooking rooms for class rooms, and the Old High school for grammar school purposes. The increased cost in the various other departments have been either normal or less than normal. The amount which the town has had to appropriate from year to year and take from the taxes has increased by a slightly greater percentage on account of the falling off of some of the outside sources of income, like the entire withdrawal of the State School Fund, etc.

The question is sometimes raised as to why the schools should not cost less when the Old High school was closed, since which time the entire expense for High school pupils has been taken care of from private sources. Although this has been previously explained, it seems best to repeat, that, at the opening of the new High school and the assumption on the part of Mr. Rogers of the entire expenses of this school, the amount of about \$3,000.00 which Mr. Rogers had been contributing to the regular teachers' salaries was withdrawn, and had to be assumed by the school department and added to its budget. This amount was almost identical with the expenses of running the Old High school. Consequently the closing of the Old High school made no difference whatever in the demands upon the school department. The assumption of the entire responsibility for the expenses of the grade schools, exclusive of the new High school, practically equals the amount needed when the Old High school was in operation.

It is hoped that this somewhat extensive review of the financial statistics over a period of ten years may be of interest and service to your board, and to those citizens who are sincerely interested in the needs and work of this department. It is exceedingly fortunate that Fairhaven has had and has, as has often been said, the advantages and privileges of a school system which is a distinct credit to the town, and of the very greatest importance to the boys and girls who are to be active citizens in the near future.

For your counsel, patience, and unstinted support in all the plans and efforts of the year, I wish to offer my hearty appreciation.

Respectfully submitted,

FRANK M. MARSH.

February 20, 1911.

Walter P. Winsor	1893-

**LIBRARIAN'S REPORT
FOR THE YEAR ENDING DEC. 31, 1910.**

To the Trustees of The Millicent Library:

I have the honor of presenting, in condensed form, the Librarian's report for 1910.

Growth

The additions for the year number 878 volumes. Two hundred and ten volumes were rejected, a net gain of 668, which brings the collection up to 20,652 volumes. Of the 878 volumes added, 541 were new titles, and the remainder additional copies or volumes. Three hundred and forty-eight volumes were fiction, 85 useful arts, 79 fine arts, 74 travel, 56 natural science, 55 education, statistics and folklore, 40 bound periodicals, 39 biography, etc. The books added to the children's room numbered 208, of which 102 were new titles.

One hundred periodicals and newspapers are subscribed for; of the more popular, from two to four copies are taken.

Binding

Over 900 volumes needing the attention of a binder were carefully examined; 210 were rejected, 582 re-bound by W. H. Collins & Co., New Bedford, and the remainder repaired by the regular staff.

Registration

A new registration of borrowers was begun June 7, and has reached the number of 1,448, most of those cards being in active use. They include 764 adults, 479 children, 91 residents of New Bedford, and 114 of other places.

Home Use

The number of current (unbound) periodicals issued, 6,751. The number of bound books issued from the main collection was 38,083, from the fiction pay duplicates, 794, and from the school room collection, 3,724; a total of 42,601 bound volumes. The total number of pieces used out of the building therefore is 50,752.

The use of the school room collections of collateral reading during the winter was large; beside the use in the school rooms themselves, over 3,700 volumes were taken home with the teacher's permission.

The bulletin as now published has stimulated interest and drawn in new readers, so that the last months of the year since the change show an increase in interest and work demanded over the corresponding months of last year.

Respectfully,

D. B. HALL, Librarian.
